

BEN JANNENA NOUR

Full Stack developer

📍 Sousse, Tunisie 📞 +216 52800526 ✉ nbenjannena@gmail.com 🌐 /in/nour-ben-jannena 🎧 Nourbj 🌐 Portfolio

Education

National Higher School of Engineers of Tunis (ENSIT) <i>Engineering Degree in Computer Engineering</i>	2022 – 2025
Preparatory Institute for Engineering Studies of Monastir (IPEIM) <i>Preparatory Cycle in Physics and Chemistry</i>	2020 – 2022

Technical Skills

Languages : Python, Java, JavaScript, TypeScript, Node.js
Frameworks / Tools : React.js, Angular, Next.js, Ionic, Django
Databases : PostgreSQL, MySQL, MongoDB, SQL Server
DevOps / Cloud : Docker, AWS, GraphQL, API Gateway

Professional Experience

Software Engineer

Freelance

2025 – Present

- Developed modern web applications using React (Vite) and Next.js.
- Built scalable backend services and RESTful APIs using NestJS.

AI Training Reviewer

Freelance

2025

- Reviewed and evaluated AI-generated content to ensure accuracy, clarity, and compliance with training guidelines.
- Contributed to the improvement of AI models across open-source software environments.
- Provided detailed feedback to enhance model reasoning, output quality, and consistency.

Final Year Project

February 2025 – June 2025

Decade

- Optimization and decoupling of customer accounts from **Magento** to a **Next.js** frontend interface, with secure authentication via **AWS** identity services.
- Architecture based on **GraphQL**, **API Gateway** and **AWS** services (security, scalability).
- Redesign of the customer entity management module.

Technician Internship

June 2024 – August 2024

Rise Up

- HR mobile application for employees: management of leaves, overtime and documents.
- Technologies: **.NET MAUI**, **ASP.NET Core**, **SQL Server**.

Initiation Internship

June 2023 – July 2023

Maher Dev

- Development of a web ERP application for call center: accounts, campaigns, authentication.
- Technologies: **Next.js**, **Django**, **PostgreSQL**

Projects

Mobile application for Small-Business

- E-commerce application for small businesses, enabling full management of customer purchases and administrator sales, including management of products, orders, and payments.
- Technologies: Ionic, Django, PostgreSQL

Project management web application

- Development of a tool for planning, executing, and monitoring projects.
- Technologies: Angular, Node.js, Express.js, MongoDB

Complete e-commerce website

- Development of a modern e-commerce website enabling complete management of the purchasing process: product catalog, cart, online payment and order validation (checkout).
- Technologies: Next.js, React.js, REST APIs

Interpersonal Skills

Languages : Arabic (native), French (advanced), English (upper-intermediate)
Personal qualities : Team spirit, clear communication, sense of organization, rigor, autonomy, motivation for learning
